

# TIMELINE

## Evolving Gender Roles in America

### TECHNOLOGY AS AN EQUALIZING FORCE

#### CREATE A TIMELINE

[Library of Congress](#)

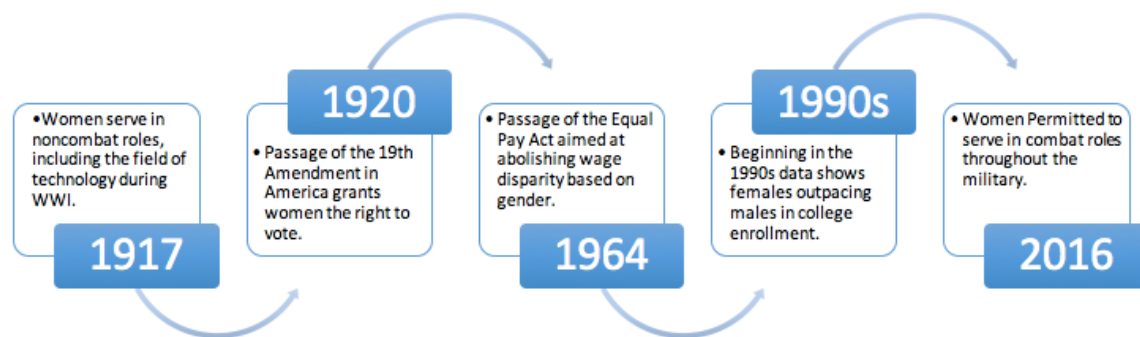

The United States experienced great progress in the last 100 years in the transformation of gender roles in society seeing the suffrage movement and many more women entering the workforce and armed forces than at any other time in modern history. The invention and implementation of technology has played a significant role in improving the standard quality of life over that same time period. The constant evolution of technology and its ability to transmit vast amounts of information nearly instantly dissolves many barriers that emerge in society due to a person's social characteristics such as race, religion, gender, creed, or nationality. In modern America the ubiquitous use of technology has leveled the playing field and opened new doors for all citizens.

**Directions:** Create a digital or poster board timeline chronicling ten significant advancements in technology as well as ten significant advancements in gender equality of the students choosing in the last ten0 years from 1917 to 2017.

**Bonus:** Expand the timeline 100 years from 2017 to 2117 and chronicle five to ten technological and/or gender advancements one could predict to see in the future of America.
